Eco-Friendly Aviation Coatings Remover 275

DESCRIPTION

Strip-Brite 275 is an environmentally friendly paint remover formulated to remove tough coatings from most surfaces. A pH neutral thixotropic gel that clings to vertical surfaces, 275 is extremely effective on multiple coats of paint. Strip-Brite 275 is non-flammable, has minimal odour, and is formulated with a superior detergent system that allows for easy rinsing. Designed for MAXIMUM viscosity and vertical clinging ability.

FEATURES

- Contains no chlorinated solvents, acids, alkalis, phenolics, or chromates.
- Removes multiple coats of paint with one application.
- Conforms to Boeing D6-17487, Revision R (excludes magnesium and cadmium).
- Conforms to MIL-R-81294 hydrogen embrittlement standards for high strength steel.
- Non-flammable, pH neutral, low odour, rinses easily.
- Minimum shelf-life of 24 months.
- Low aquatic toxicity and high biodegradability.

DIRECTIONS

Strip-Brite 275 should be used full strength at 65 - 85 °F. Apply a thick and even coat with a non-atomizing spray or brush. Allow sufficient time for paint to loosen (4 to 16 hours) and then agitate with a stiff bristle brush. Check if paint has been completely removed; if not, apply an additional coat of Strip-Brite 275 and allow more time for stripping. When stripping is complete, wash with cold or warm water at 50 psi or higher.

CAUTION

Strip-Brite 275 contains benzyl alcohol and hydrogen peroxide. Avoid ingestion, inhalation of vapour, and contact with skin, eyes and clothing. Use a face shield and solvent resistant clothing when handling or working with this product. Plexiglass, composite materials and rubber should be protected from contact with Strip-Brite 275. Other surface materials, metals and alloys may also be incompatible with this stripper; always test a small area prior to widespread application to ensure proper results.
